About real estate

The offered apartment is located on the ground floor of house No. 4, which is part of the construction of the 3rd stage of the project Červený dub, in Kostelec nad Černými lesy. Within this stage, 5 chamber houses will be built, each with only four units. The project is therefore an excellent solution for those who prefer a quieter and healthier lifestyle close to nature with good access to larger cities. There is a beautiful undulating forest landscape around the project, and you can reach Prague or Říčany or Český Brod in a few tens of minutes by car or bus, or even by train. A great advantage of the project houses is self-sufficiency in electricity production. All the houses have a system of roof photovoltaic panels. The energy performance of the building is B - very energy efficient.

Apartment 4B is a 3 bedroom apartment with a garden and is situated on the ground floor of house 4. Its orientation is S, E. The total usable area of the apartment is 102.5 sqm and the slightly sloping garden has an area of 363 sqm. The apartment consists of an entrance hall with storage space and entrance to both the utility room with laundry and the adjoining separate corridor connecting all four rooms of the apartment. There is also a living room, pleasantly illuminated by massive glazing with an exit to the terrace and the garden. There is a preparation for the kitchen. The orientation of the apartment is to the E, N and W. The garden surrounds the apartment on two sides and it exits all the rooms of the apartment.

The house will be built of porous concrete blocks YTONG Statik PD 250 mm, will be insulated, plastic windows with triple glazing and preparation for blinds. The garden will be fenced and there will be an accumulation pit for rainwater. The house will be secured with Jablotron system. Heating is electric, underfloor. The source of electricity are own photovoltaic panels on the roof of the house (for 4 apartments) Water heating by storage heater OKCE 200. In the apartment is also installed under-ceiling recuperation unit. A sewage connection will be prepared for each house, after the municipal sewage treatment plant is capacious, there will be a reconnection. At this time, the wastewater will be discharged into two sewage sumps with a total volume of 20 m³.

The picturesque town of Kostelec nad Černými lesy has complete civic amenities and allows comfortable family living in close proximity to nature. You will find here schools, kindergartens, the Czech University of Life Sciences, doctors, pharmacies, supermarkets, post office, bank, restaurants, hairdresser and veterinary surgery. Excellent transport accessibility to Prague - by car 30 min. to Černý Most or 50 min. to the center of Prague, regular bus connection to the metro station Háje.
